- BlackBerry Access

What's new in BlackBerry UEM

What's new in UEM version 12.19 and UEM Cloud

Feature	Cloud release date and on-prem version	Description
Changes to iOS IT policy rules and compliance rules	April 2024 12.19 Quick Fix 3	This release includes the following changes: • The "Allow marketplace apps" IT policy rule has been added to allow you to control whether users can install marketplace apps. This rule is supported for iOS 17.4 and later. (EMM-155942) • The functionality of the following iOS IT policy rules now extend to marketplace apps: Allow installing apps (supervised only), Allow removing apps (supervised only). • The functionality of the following iOS compliance rules now extend to marketplace apps: Show only allowed apps on the device, Restricted app is installed. For more information, see the UEM 12.19 IT policy rules reference.
New iOS IT policy rules	January 2024 12.19 Quick Fix 1	The following IT policy rules have been added for devices with iOS 17.2 and later: • Preserve eSIM data plan on device wipe (supervised only) • Allow Live Voicemail (supervised only) For more information, see the UEM 12.19 IT policy rules reference.
Console URLs	October 2023 12.19	The UEM console URLs have changed in this release to include additional information at the end of the path: • Management console: https://*<server_name>*:*<port>*/admin/index.jsp?tenant=*<tenant_ID>*&redirect=no • UEM Self-Service console: https://*<server_name>*:*<port>*/mydevice/index.jsp?tenant=*<tenant_ID>*&redirect=no If you integrate UEM with Entra ID, the UEM console URLs change to the following ("&redirect=no" is removed from the end of the URL): • Management console: https://*<server_name>*:*<port>*/admin/index.jsp?tenant=*<tenant_ID>* • Self-service console: https://*<server_name>*:*<port>*/mydevice/index.jsp?tenant=*<tenant_ID>*

Feature	Cloud release date and on-prem version	Description
New OS support	October 2023 12.19	The following operating systems are now supported: • iOS 17: Includes support for RSA-PSS and DH group 32 in VPN profiles and TLS 1.3 in Wi-Fi profiles • Android 14
JRE 17 required	October 2023 12.19	You must install JRE 17 on the servers where you will install UEM, and you must set an environment variable that points to the BB_JAVA_HOME home location. For more information, see Set an environment variable for the Java location.
Connect UEM on-premises to Entra ID	October 2023 12.19	You can now connect BlackBerry UEM on-premises to Entra ID to create and synchronize users and directory-linked groups. For more information, see Connect BlackBerry UEM to Entra ID.
New Android Management activation types	October 2023 12.19	Three new activation types that support the Android Management API have been added: • Work and personal - full control (Android Management fully managed device with work profile) • Work and personal - user privacy (Android Management with work profile) • Work space only (Android Management fully managed device) For more information, see the following: • Considerations for Android Management activation types • Configuring BlackBerry UEM to support Android Management devices • Activation types: Android devices • Activating Android devices
Knox Service Plugin policies	October 2023 12.19	You can now configure KSP policies from the Policies and profiles menu in the UEM management console instead of an app configuration. For more information, see Managing Android devices with OEM app configurations profile.
iOS app update dispositions	October 2023 12.19	You can now specify new "Required without updates" or "Optional without updates" dispositions for iOS VPP apps and assign them to users, user groups, device groups, shared device groups, and public device groups. For shared iPad groups you can assign "Required without updates".
iOS RSR versions	October 2023 12.19	You can now select an RSR version as the minimum allowed OS version in activation profiles for iOS devices.

Feature	Cloud release date and on-prem version	Description
New BlackBerry Dynamics profile setting	October 2023 12.19	You can use the new "Allow WatchOS apps" setting to control whether end users can pair their Apple WatchOS apps with BlackBerry Dynamics apps. This setting is off by default. For more information, see BlackBerry Dynamics profile settings.
Updated compliance variable	October 2023 12.19	You can now use the %ComplianceApplicationList% variable to display the names of restricted apps that are installed on a device in compliance notifications that are sent to users. For more information, see Using variables in profiles, emails, and notifications.
LDAP directory enhancements (UEM on-premises only)	October 2023 12.19	Paged search results are now supported for LDAP directories.
SIM management enhancement	October 2023 12.19	You can now view the information for multiple SIMs for a device on the Device details screen, including eSIM information.
Enhancements to the Managed device users screen	October 2023 12.19	You can now add the Bluetooth MAC address as an optional field in the Advanced view of the Managed device users screen. You can also export this data from this view.
Export personal apps list	October 2023 12.19	You can now export a list of the personal apps that are installed on a user's device. The list includes the user and device name, the app name and version, the OS type and version, and the installation date.
Feature enhancements for the BlackBerry UEM Client	October 2023 12.19	See the UEM Client Release Notes to learn about the latest features: • UEM Client for Android • UEM Client for iOS

New in UEM version 12.18 and UEM Cloud

The table below details the new features in this release. For information about the fixed and known issues in this release, see the UEM 12.18 Release Notes or the UEM Cloud Release Notes.

Feature	Cloud release date and on-prem version	Description
Export personal apps list	July 2023 12.18 QF1	You can now export a list of the personal apps that are installed on a user's device. The list includes the user and device name, the app name and version, the OS type and version, and the installation date.

Feature	Cloud release date and on-prem version	Description
Preserve the data plan on Android eSIM devices	May 2023 12.18	UEM now provides an option to preserve the data plan on an Android eSIM device when you select the delete all device data command. By default, the data plan information is preserved when you select the delete all device data command. For more information, see Sending commands to users and devices.
Show last password change in the management console	May 2023 12.18	The date and time of the last time that a user changed the password for the BlackBerry UEM Client or a BlackBerry Dynamics app is now displayed in the devices table and on the device details page. This feature requires a version of the UEM Client or BlackBerry Dynamics apps released in June 2023 or later.
Display information for multiple device SIMs in the management console	May 2023 12.18	If a device has more than one SIM (for example, a physical and eSIM), information for all SIMs is now displayed in the device report. The device details page shows SIM information only for the phone number that has been selected by the user as the default for voice calls.
Feature enhancements for the BlackBerry UEM Client	May 2023 12.18	See the UEM Client Release Notes to learn about the latest features: • UEM Client for Android • UEM Client for iOS

New in UEM version 12.17 and UEM Cloud

The table below details the new features in this release. For information about the fixed and known issues in this release, see the UEM 12.17 Release Notes or the UEM Cloud Release Notes.

Feature	Cloud release date and on-prem version	Description
Export personal apps list	July 2023 12.17 MR1 QF2	You can now export a list of the personal apps that are installed on a user's device. The list includes the user and device name, the app name and version, the OS type and version, and the installation date.

Feature	Cloud release date and on-prem version	Description
Preserve the data plan on iOS eSIM devices	February 2023 12.17 MR1	UEM now provides an option to preserve the data plan on an iOS eSIM device when you select the delete all device data command. If eSIM information is detected on the device, a pop-up will display asking if you want to preserve the data plan. The default action is to delete the data plan and you have to choose to preserve it. For more information, see Sending commands to users and devices.
Rapid Security Response support for iOS	February 2023 12.17 MR1	After a Rapid Security Response (RSR) build has been installed on an iOS 16 or later device, the RSR version is displayed in the users table, the device details page, device reports, and exports. You can also select the RSR version as a restricted OS version in compliance profiles.
Activate Android Enterprise devices while on a mobile network	February 2023 12.17 MR1	Android Enterprise devices can now be activated when they are using a mobile network. This feature applies only to Work space only (Android Enterprise) and Work and personal - full control (Android Enterprise) activation types.
Support for multilingual compliance variables in email templates	February 2023 12.17 MR1	You can now use multiple languages (German, Spanish, French, and Japanese) with the following compliance variables in email templates: • %ComplianceDynamicsEnforcementAction% • %ComplianceDynamicsEnforcementActionWithDescription% • %ComplianceEnforcementAction% • %ComplianceEnforcementActionWithDescription% • %ComplianceRuleViolated% • %ComplianceViolationExpiration% For more information, see Variables.
New Android IT policy rule (Samsung Knox)	February 2023 12.17 MR1	Allow screenshots in the work profile to be stored in the personal profile: Specify whether screenshots taken in the work profile can be saved in the personal profile. For more information, see the Policy reference spreadsheet.

Feature	Cloud release date and on-prem version	Description
New end user capabilities for BlackBerry Dynamics apps using third-party identity provider credentials	September 2022 12.17	• Users can now unlock a BlackBerry Dynamics app using their third-party identity provider credentials. For more information, see Unlock a BlackBerry Dynamics app using a third-party identity provider. • Users can now activate BlackBerry Dynamics apps after they restore their device using their third-party identity provider credentials. For more information, see Activate a BlackBerry Dynamics app after a device restore using a third-party identity provider. • Users can now retrieve their BlackBerry Dynamics app password using their third-party identity provider credentials. For more information, see Reset your BlackBerry Dynamics app password using a third-party identity provider.
New OS support	September 2022 12.17	This release adds support for devices running: • Android 13 • iOS 16
DEP activation enhancements for iOS	September 2022 12.17	After the UEM Client has been activated on an iOS device that is enrolled in DEP, during any subsequent activation, if there is no device activation password set for the user, the UEM Client displays a message that tells the user how to activate their device.
Export a list of iOS devices not using a hardened channel	September 2022 12.17	You can export a list of devices that are not already using a hardened channel and migrate them so that they use a hardened channel. For more information, see Migrate iOS devices to use a hardened channel.
BlackBerry Dynamics passcode fallback for iOS biometric authentication	September 2022 12.17	A new option, "Permit fallback to device passcode if biometric authentication fails", has been added to the BlackBerry Dynamics profile. This option allows iOS biometric (TouchID/FaceID) authentication to fall back to the device passcode if biometric authentication fails. For more information, see Controlling BlackBerry Dynamics on users devices.
App removal enhancements for Android	September 2022 12.17	For devices that were activated using the Work space only (Android Enterprise) activation type, when an app is removed from Google Play or unassigned from a user, the app is removed from the device automatically.

Feature	Cloud release date and on-prem version	Description
Enhancements for Chrome OS support	September 2022 12.17	• You can now add a connection to your organization's Google domain even when you already have a connection set up. This enables you to set up a connection to manage your organization's Chrome devices without removing any connections that you have already set. • In an org unit, you can now use the 24-hour time format in the start time fields. For more information, see Extending the management of Chrome OS devices to BlackBerry UEM.
New iOS IT policy rules	September 2022 12.17	• Allow Mail Privacy Protection: Specify whether mail protection is enabled. • Allow Rapid Security Response Installation: Specify whether rapid security response is enabled. • Allow Rapid Security Response Removal: Specify whether users can disable rapid security response. For more information, see the Policy reference spreadsheet.

New in UEM version 12.16 and UEM Cloud

The table below details the new features in this release. For information about the fixed and known issues in this release, see the UEM 12.16 Release Notes or the UEM Cloud Release Notes.

Feature	Cloud release date and on-prem version	Description
Support for Chrome OS	August 2022 12.16 MR1	UEM now supports devices that are running Chrome OS. The Chrome OS integration with BlackBerry UEM extends some of the Chrome OS management functionality to UEM. You can perform some commands on Chrome OS devices, such as view device report, view device actions, and delete only work data. For more information, see KB 98789 and Extending the management of Chrome OS devices to BlackBerry UEM.
Multiple connections for Entra ID conditional access	August 2022 12.16 MR1	You can now configure multiple Entra ID connections for conditional access in a UEM tenant. You can also configure multiple UEM domains to connect to the same Entra ID tenant. For more information, see Connecting BlackBerry UEM to Microsoft Azure.

Feature	Cloud release date and on-prem version	Description
Changes to the on-premises installer	August 2022 12.16 MR1	The BlackBerry Affinity Manager, BlackBerry Dispatcher, and BlackBerry MDS Connection Service components have been removed from the installation and upgrade process. These components were used only for managing BlackBerry 10 devices, which are no longer supported. For more information about a BlackBerry Affinity Manager disconnected status, see KB 90941.
Support for shared iPad devices	March 2022 12.16	iPad devices can now be shared between multiple users. When users sign in with a Managed Apple ID, their data loads and the user has access to their own email accounts, files, iCloud Photo Library, app data, and more. For more information, see Creating and managing shared iPad groups.
Support for the CryptoTokenKit framework for iOS	March 2022 12.16	UEM now supports the CryptoTokenKit framework for iOS devices so that BlackBerry Dynamics apps can access cryptographic tokens from PKI apps such as Purebred. Support for cryptographic tokens is enabled when you select the "Native keystore" connection option and the iOS platform in the user credential profile. This feature requires apps that use BlackBerry Dynamics SDK 10.2 or later. For more information, see Sending client certificates to devices and apps using user credential profiles.
UTI requirement for Purebred 2.1 (8)	March 2022 12.16	When you use the Purebred app version 2.1 (8) or later, which must be submitted through the Custom App Distribution mechanism, you must update the uniform type identifiers (UTI) that contain underscores ('_') to dashes ('-') for the BlackBerry UEM Client app policy. For example, use `purebred.select.all-user; purebred.select.no-filter; purebred.zip.all-user; purebred.zip.no-filter.` Users may need to reactivate the new Purebred app on their device.

Feature	Cloud release date and on-prem version	Description
Profile enhancements	March 2022 12.16	• Device SR requirements profile: You can now apply Android OS updates to Samsung devices. For more information, see Controlling the software updates that are installed on devices. • BlackBerry Dynamics profile: A new option allows you to specify whether Android device users can use custom keyboards with BlackBerry Dynamics apps. For more information, see Controlling BlackBerry Dynamics on users devices. • VPN profile: You can specify an associated proxy profile when you select "IKEv2 Always On". For more information, see Setting up work VPNs for devices. • User credential profiles: In profiles that use native keystore connections, you can now specify the device OS platforms that you want the profile to apply to. For more information, see Sending client certificates to devices and apps using user credential profiles.
Changes to the management console	March 2022 12.16	• The Android app license page has been removed from the management console. • You must use the Organize Apps functionality in Google Play iFrame to manage your Google Play Store layout. You can no longer use the Category drop-down list in the app details to manage your Google Play Store layout.
New Android IT policy rule	March 2022 12.16	Work apps exempt from VPN: Specify the work apps that are not required to send data over the work connection when "Force work apps to only use VPN" is selected. For more information, see the Policy reference spreadsheet.
New iOS IT policy rule	March 2022 12.16	Recommended software update cadence (supervised only): Specify how software updates are presented to the user. When there is only one update available, the system shows the update to the user. Otherwise, the updates are displayed in the specified order. This rule applies only to devices running iOS 14.5.0 and later. For more information, see the Policy reference spreadsheet.

What's new in BlackBerry Work

New in BlackBerry Work version 3.15

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Work version 3.15 Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description

Email enhancements	January 2024
	
	iOS: 3.15.0.445
	
	Android: 3.15.0.1848
		• Users can now create an S/MIME PIN with more than six characters for sending and receiving email, and administrators can now enforce a minimum number of characters for an S/MIME PIN.
		• In the email list view:
		  • iOS: The icons, the top bar and the bottom bar have been redesigned, users can now set a one-line preview for messages, and new Yesterday and Last Week sections improve the presentation of data.
		  • Android: The icons have been redesigned, and users can now set a one-line preview for messages.
		• Android only: Users can now set all email notifications as high priority, and notifications will include an audible signal.

Calendar enhancements	January 2024 iOS: 3.15.0.445 Android: 3.15.0.1848	• iOS: An administrator can now set a shared calendar to synchronize every 10 minutes when the calendar is in the foreground. • Android: An administrator can now set a shared calendar to synchronize every 10 minutes when the calendar is in the foreground, and the icons have been redesigned.
Apple Watch enhancements	January 2024 iOS: 3.15.0.445	Users can now open Complication options on an Apple Watch by tapping a complication on the watch face, and a recurrence icon for events now displays on the watch face.
UI enhancements	January 2024 iOS: 3.15.0.445	New icons have been implemented in the hamburger menu.
Changes to OS support	January 2024 iOS: 3.15.0.445 Android: 3.15.0.1848	• iOS: BlackBerry Work is no longer compatible with iOS 15. • Android: BlackBerry Work is no longer compatible with Android 10.

Feature	Release date and app version	Description
BlackBerry Persona mobile (BIS)	January 2024 iOS: 3.15.0.445 Android: 3.15.0.1848	BlackBerry Work is no longer compatible with BlackBerry Persona mobile.

New in BlackBerry Work version 3.14

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Work version 3.14 Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
New app configuration option	October 2023 (UEM 12.19)	This UEM release adds a new app configuration option for BlackBerry Work that you can use to prevent iOS users from taking screenshots in BlackBerry Work. For more information, see BlackBerry Work app configuration settings.
Support for application language	October 2023 Android: 3.14.0.1821	Users can now change the language displayed in BlackBerry Work. For more information, see Change your application language.
Usability improvements	October 2023 Android: 3.14.0.1821	• BlackBerry Work now supports HTML formatting when exporting events to .ics files. • Users can now search for the destination folder when moving emails in BlackBerry Work. • Users can now duplicate multiple files at once.
Changes to OS support	October 2023 Android: 3.14.0.1821 September 2023 iOS: 3.14.0.10345	• iOS: BlackBerry Work is now compatible with iOS 17. • Android: BlackBerry Work is now compatible with Android 14.
Support for Apple Watch (Beta)	September 2023 iOS: 3.14.0.10345	Users can now use BlackBerry Work on an Apple Watch to manage email messages and calendar events. For more information, see Using BlackBerry Work on an Apple Watch.
UI enhancements	September 2023 iOS: 3.14.0.10345	The menu in BlackBerry Work Docs has undergone UI enhancements.

Feature	Release date and app version	Description
Email previews	September 2023 iOS: 3.14.0.10345	BlackBerry Work now displays a preview of an email message in its notification. This feature requires BEMS 3.7 or later. For more information, see the Notifications table in BlackBerry Work app configuration settings.

New in BlackBerry Work version 3.13

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Work for iOS Release Notes or the BlackBerry Work for Android Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Support for Microsoft Teams	June 2023 iOS: 3.13.0.10040 Android: 3.13.0.1797	Users can now create and join Microsoft Teams meetings on BlackBerry Work. Microsoft Teams calls and chats can also be launched from BlackBerry Work Contacts.
Subfolder notifications	June 2023 iOS: 3.13.0.10040 Android: 3.13.0.1797	BlackBerry Work now supports email notifications for subscribed subfolders. For more information, see BlackBerry Work app configuration settings.
Block images from external sources	June 2023 iOS: 3.13.0.10040 Android: 3.13.0.1797	BlackBerry Work can now block downloading images from external sources. For more information, see BlackBerry Work app configuration settings.
Screenshot prevention	June 2023 iOS: 3.13.0.10040	You can prevent users from taking screenshots of BlackBerry Work using the new "Prevent Screenshots on iOS" IT policy rule. For more information, see BlackBerry Work app configuration settings.
UI enhancements	June 2023 iOS: 3.13.0.10040 Android: 3.13.0.1797	• iOS: Improvements have been made to the colors and search animations for BlackBerry Work Docs. • Android: New icons have been introduced in the BlackBerry Dynamics Launcher.
Changes to Android OS support	June 2023 Android: 3.13.0.1797	BlackBerry Work is no longer compatible with Android 9.

What's new in BlackBerry Tasks

New in BlackBerry Tasks version 3.15

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Tasks version 3.15 Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Changes to OS support	January 2024 iOS: 3.15.0.971 Android: 3.15.0.3783	• iOS: BlackBerry Tasks is no longer compatible with iOS 15. • Android: BlackBerry Tasks is no longer compatible with Android 10.

New in BlackBerry Tasks version 3.14

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Tasks version 3.14 Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Screenshot prevention	September 2023 iOS: 3.14.0.951	You can prevent users from taking screenshots of BlackBerry Tasks using the new "Prevent Screenshots on iOS" IT policy rule. For more information, see BlackBerry Tasks and Notes app configuration settings.
Support for application language	October 2023 Android: 3.14.0.3772	Users can now change the language displayed in BlackBerry Tasks. For more information, see Change your application language.
Changes to OS support	October 2023 Android: 3.14.0.3772 September 2023 iOS: 3.14.0.951	• iOS: BlackBerry Tasks is now compatible with iOS 17. • Android: BlackBerry Tasks is now compatible with Android 14.

New in BlackBerry Tasks version 3.13

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the

BlackBerry Tasks for iOS Release Notes or the BlackBerry Tasks for Android Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Support for Microsoft Entra ID conditional access	June 2023 iOS: 3.13.0.922 Android: 3.13.0.3754	BlackBerry Tasks can now be provisioned with Entra conditional access. For more information, see BlackBerry Tasks and Notes app configuration settings.
User experience improvements	June 2023 iOS: 3.13.0.922 Android: 3.13.0.3754	For iOS, users can now dismiss modally presented screens by swiping down. For Android, new icons have been introduced in the BlackBerry Dynamics Launcher.
Change to Android OS support	June 2023 Android: 3.13.0.3754	BlackBerry Tasks is no longer compatible with Android 9.

What's new in BlackBerry Notes

New in BlackBerry Notes version 3.15

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Notes version 3.15 Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Changes to OS support	January 2024 iOS: 3.15.0.971 Android: 3.15.0.3783	• iOS: BlackBerry Notes is no longer compatible with iOS 15. • Android: BlackBerry Notes is no longer compatible with Android 10.

New in BlackBerry Notes version 3.14

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Notes version 3.14 Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Screenshot prevention	September 2023 iOS: 3.14.0.951	You can prevent users from taking screenshots of BlackBerry Notes using the new "Prevent Screenshots on iOS" IT policy rule. For more information, see BlackBerry Tasks and Notes app configuration settings.
Support for application language	October 2023 Android: 3.14.0.3772	Users can now change the language displayed in BlackBerry Notes. For more information, see Change your application language.
Changes to OS support	October 2023 Android: 3.14.0.3772 September 2023 iOS: 3.14.0.951	• iOS: BlackBerry Notes is now compatible with iOS 17. • Android: BlackBerry Notes is now compatible with Android 14.

New in BlackBerry Notes version 3.13

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the

BlackBerry Notes for iOS Release Notes or the BlackBerry Notes for Android Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Support for Microsoft Entra ID conditional access	June 2023 iOS: 3.13.0.922 Android: 3.13.0.3754	BlackBerry Notes can now be provisioned with Entra conditional access. For more information, see BlackBerry Tasks and Notes app configuration settings.
User experience improvements	June 2023 iOS: 3.13.0.922 Android: 3.13.0.3754	For iOS, users can now dismiss modally presented screens by swiping down. For Android, new icons have been introduced in the BlackBerry Dynamics Launcher.
Change to Android OS support	June 2023 Android: 3.13.0.3754	BlackBerry Notes is no longer compatible with Android 9.

What's new in BlackBerry Access

New in BlackBerry Access version 3.6

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Access Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Changes to OS support	October 2023 Android: 3.6.1.102 September 2023 iOS: 3.6.1.1435	BlackBerry Access is now compatible with: • iOS 17 • Android 14
Screenshot prevention	September 2023 iOS: 3.6.1.1435	You can prevent users from taking screenshots of BlackBerry Access using the new "Prevent Screenshots on iOS" IT policy rule. For more information, see BlackBerry Access app configuration settings.
Browser history improvements	June 2023 iOS: 3.6.0.1416	Users can now clear their browsing history based on the following time periods: • All time • Today and yesterday • Today • The last hour For more information, see View, search, and delete browsing history in the BlackBerry Access for iOS user guide.
Change to Android OS support	June 2023 Android: 3.6.0.51	BlackBerry Access is no longer compatible with Android 9.

New in BlackBerry Access version 3.5

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Access Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Specify different app configuration settings for separate device types	March 2023 iOS: 3.5.3.1397 Android: 3.5.1.105	Administrators can now specify different BlackBerry Access app configuration settings for the same user on separate device types (mobile and desktop) in the "Policy Overrides For Mobile" settings. For more information, see BlackBerry Access app configuration settings in the Administration Guide.
Browser history improvements	March 2023 iOS: 3.5.3.1397	Users can now tap the "Edit" button and then swipe to the left to delete individual history items and downloads. For more information, see View, search, and delete browsing history in the BlackBerry Access for iOS User Guide.
Changes to iOS compatibility	March 2023 iOS: 3.5.3.1397	BlackBerry Access is no longer compatible with iOS 14.
Software quality improvements	March 2023 iOS: 3.5.3.1397	• BlackBerry Access for iOS is now compiled using Xcode 14. • IndexedDB is now supported, with the limitation that BLOB data storage is not supported.
Support for third-party phone call services	March 2023 Android: 3.5.1.105	Users can now use a third-party phone call service such as CellTrust when they click on a phone number in BlackBerry Access. To use this feature, administrators will need to enable "Allow phone number to dial using entitled and installed Dynamics VOIP apps" in the app configuration settings. For more information, see BlackBerry Access app configuration settings in the Administration Guide.
Export download files to native apps	March 2023 Android: 3.5.1.105	Users can share files to third-party apps from the download folder. If you want your users to use this feature, you must select "Enable exporting to 3rd-party native apps" in the app configuration policy and specify the allowed apps. This policy is not applied when the DLP policy "Do not allow copying data from BlackBerry Dynamics apps into non BlackBerry Dynamics apps" option is selected in the BlackBerry Dynamics profile. For more information, see BlackBerry Access app configuration settings in the Administration Guide.
Changes to OS support	November 2022 Android: 3.5.0.142 September 2022 iOS: 3.5.0.1383	BlackBerry Access is now compatible with: • iOS 16 • Android 13

New in BlackBerry Access version 3.4

The table below details the new features in this release. For information about fixed and known issues, supported upgrade paths, and the versions of the BlackBerry Dynamics SDK and BlackBerry Dynamics Launcher, see the BlackBerry Access Release Notes. For device OS compatibility, see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix.

Feature	Release date and app version	Description
Set BlackBerry Access for Windows as the default browser	July 2023 BlackBerry Access for Windows: 3.4.3.13 BlackBerry Work for Windows: 3.4.1.417	An administrator can now set BlackBerry Access for Windows as the default browser.
Usability improvement	July 2023 BlackBerry Access for Windows: 3.4.3.13 BlackBerry Work for Windows: 3.4.1.417	If an administrator has set BlackBerry Access for Windows as the default browser, clicking on a URL shortcut on the desktop will open in a new tab in BlackBerry Access.
Support for Entra ID sign-in frequency conditional access policy	December 2022 BlackBerry Access for Windows: 3.4.1.19 BlackBerry Work for Windows: 3.4.1.417 BlackBerry Access for macOS: 3.4.1.23 BlackBerry Work for macOS: 3.4.1.417	The Microsoft Entra ID Active Directory "Sign-in frequency" conditional access policy is supported in this release. Administrators can enable this policy to configure the time period before a user will need to sign in and reauthorize the session. For more information on Entra ID conditional access, see the Microsoft documentation.
Export download files to native apps	May 2022 iOS: 3.4.0.1373	Users can share files to third-party apps from the download folder. If you want your users to use this feature, you must select "Enable exporting to 3rd-party native apps" in the app configuration policy and specify the allowed apps. This policy is not applied when the DLP policy "Do not allow copying data from BlackBerry Dynamics apps into non BlackBerry Dynamics apps" option is selected in the BlackBerry Dynamics profile. For more information, see BlackBerry Access app configuration settings in the Administration Guide.

Feature	Release date and app version	Description
Support for custom URL schemes	May 2022 iOS: 3.4.0.1373	Users can open custom URL schemes supported by third-party apps. If you want your users to use this feature, in the app configuration settings, you must select the "Enable 3rd Party Applications" option and specify the custom URL schemes that BlackBerry Access can open. For more information, see BlackBerry Access app configuration settings in the Administration Guide.
Usability improvements	May 2022 iOS: 3.4.0.1373	• Users can zoom in and out on a webpage. The last used zoom value of the page is saved. • Users can create, edit, and move folders in the bookmark menu. • Users can now enter reader mode when they view a web page. Reader mode emphasizes text content on a page and obscures UI elements such as advertisements. • Chromium version 92 is now supported.
Support for third-party phone call services	May 2022 iOS: 3.4.0.1373	Users can now use a third-party phone call service such as CellTrust when they click on a phone number in BlackBerry Access. To use this feature, administrators will need to enable "Allow phone number to dial using entitled and installed Dynamics VOIP apps" in the app configuration settings. For more information, see BlackBerry Access app configuration settings in the Administration Guide.
Changes to iOS compatibility	May 2022 iOS: 3.4.0.1373	BlackBerry Access is no longer compatible with iOS 13 or iPadOS 13.

Legal notice

WERE FORESEEN OR UNFORESEEN, AND EVEN IF BLACKBERRY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW IN YOUR JURISDICTION, BLACKBERRY SHALL HAVE NO OTHER OBLIGATION, DUTY, OR LIABILITY WHATSOEVER IN CONTRACT, TORT, OR OTHERWISE TO YOU INCLUDING ANY LIABILITY FOR NEGLIGENCE OR STRICT LIABILITY.

THE LIMITATIONS, EXCLUSIONS, AND DISCLAIMERS HEREIN SHALL APPLY: (A) IRRESPECTIVE OF THE NATURE OF THE CAUSE OF ACTION, DEMAND, OR ACTION BY YOU INCLUDING BUT NOT LIMITED TO BREACH OF CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR ANY OTHER LEGAL THEORY AND SHALL SURVIVE A FUNDAMENTAL BREACH OR BREACHES OR THE FAILURE OF THE ESSENTIAL PURPOSE OF THIS AGREEMENT OR OF ANY REMEDY CONTAINED HEREIN; AND (B) TO BLACKBERRY AND ITS AFFILIATED COMPANIES, THEIR SUCCESSORS, ASSIGNS, AGENTS, SUPPLIERS (INCLUDING AIRTIME SERVICE PROVIDERS), AUTHORIZED BLACKBERRY DISTRIBUTORS (ALSO INCLUDING AIRTIME SERVICE PROVIDERS) AND THEIR RESPECTIVE DIRECTORS, EMPLOYEES, AND INDEPENDENT CONTRACTORS.

IN ADDITION TO THE LIMITATIONS AND EXCLUSIONS SET OUT ABOVE, IN NO EVENT SHALL ANY DIRECTOR, EMPLOYEE, AGENT, DISTRIBUTOR, SUPPLIER, INDEPENDENT CONTRACTOR OF BLACKBERRY OR ANY AFFILIATES OF BLACKBERRY HAVE ANY LIABILITY ARISING FROM OR RELATED TO THE DOCUMENTATION.

Prior to subscribing for, installing, or using any Third Party Products and Services, it is your responsibility to ensure that your airtime service provider has agreed to support all of their features. Some airtime service providers might not offer Internet browsing functionality with a subscription to the BlackBerry® Internet Service. Check with your service provider for availability, roaming arrangements, service plans and features. Installation or use of Third Party Products and Services with BlackBerry's products and services may require one or more patent, trademark, copyright, or other licenses in order to avoid infringement or violation of third party rights. You are solely responsible for determining whether to use Third Party Products and Services and if any third party licenses are required to do so. If required you are responsible for acquiring them. You should not install or use Third Party Products and Services until all necessary licenses have been acquired. Any Third Party Products and Services that are provided with BlackBerry's products and services are provided as a convenience to you and are provided "AS IS" with no express or implied conditions, endorsements, guarantees, representations, or warranties of any kind by BlackBerry and BlackBerry assumes no liability whatsoever, in relation thereto. Your use of Third Party Products and Services shall be governed by and subject to you agreeing to the terms of separate licenses and other agreements applicable thereto with third parties, except to the extent expressly covered by a license or other agreement with BlackBerry.

The terms of use of any BlackBerry product or service are set out in a separate license or other agreement with BlackBerry applicable thereto. NOTHING IN THIS DOCUMENTATION IS INTENDED TO SUPERSEDE ANY EXPRESS WRITTEN AGREEMENTS OR WARRANTIES PROVIDED BY BLACKBERRY FOR PORTIONS OF ANY BLACKBERRY PRODUCT OR SERVICE OTHER THAN THIS DOCUMENTATION.
