Installing the maintenance release

1

Where to install the maintenance release

Install this maintenance release on any computer that hosts a BlackBerry® Enterprise Server and on any remote computer that hosts a BlackBerry Attachment Service, BlackBerry Manager, or BlackBerry Router.

Verify the BlackBerry Enterprise Server software version

This maintenance release works with BlackBerry® Enterprise Server 4.1 SP7 for IBM® Lotus® Domino®.

1. On the taskbar, click **Start > Settings > Control Panel** or **Start > Control Panel**.
2. Double-click **Add or Remove Programs**.
3. In the list of currently installed programs, click **BlackBerry Enterprise Server for IBM Lotus Domino**.
4. Click **Click here for support information**.
5. Verify that the version number is 4.1.7 (Bundle 27).

Install the maintenance release

Before you begin: On the computer that hosts the BlackBerry® Enterprise Server, configure access to the installation media that was used to install the BlackBerry Enterprise Server. Depending on how the software was installed, this might be a product CD or a network location.

1. While logged in to the computer that hosts the BlackBerry Enterprise Server, in Windows® Services, stop all BlackBerry Enterprise Server services.
2. Close the BlackBerry Configuration Panel.
3. Double-click **besn417mr1.zip**.
4. Extract the installation files to a local drive on your computer.
5. Browse to the location of the setup program files.
6. Double-click **besn417mr1.msp** to run the executable.
7. Click **Update**.
8. Complete the configuration screens.
9. Click **Finish**.
10. In Windows Services, restart all BlackBerry Enterprise Server services.

Verify that you installed the maintenance release

1. On the taskbar, click **Start > Settings > Control Panel** or **Start > Control Panel**.
2. Click **Add or Remove Programs**.
3. In the list of programs, click **BlackBerry Enterprise Server for IBM Lotus Domino**.
4. Click **Click here for support information**.
5. Verify that the version number is 4.1.7 MR1 (Rollup) (Bundle 32).

Fixed issues

Activation

After a user activated a BlackBerry® device, the BlackBerry® Enterprise Server might synchronize organizer data more than once if you changed the user account information before activation occurred. (SDR 358491)

BlackBerry Messaging Agent

The access control list for the BBTempMailBox.nsf database allowed any user who could access the server to delete the database. In this release, the default permission for the access control list is No Access. (DT 323757)

If you deleted the personal document for a user account and then deleted the user account and change the operating system time, the BlackBerry Enterprise Server performed a memory dump. (DT 235032)

If the BlackBerry Enterprise Server encountered a SQL error when it tried to initialize user accounts, users no longer received email messages on BlackBerry devices. (DT 369719)

BlackBerry Policy Service

In certain circumstances, the BlackBerry Policy Service did not process requests in a timely manner. (DT 391803)

After the BlackBerry Policy Service lost its connection to the database server and reconnected, the BlackBerry Policy Service did not initialize correctly. (DT 395885)

Calendar synchronization

In certain circumstances, when the BlackBerry Enterprise Server processed a rejected meeting message, the BlackBerry Enterprise Server might have stopped responding. (DT 350980)

If a meeting series included a large number of exceptions and a lot of data in the meeting body, the BlackBerry Enterprise Server might not send any occurrences of the meeting series to a BlackBerry device. (DT 342276)

In certain circumstances, notifications that meeting recipients had accepted or rejected meeting invitations synchronized to a BlackBerry device before the meeting invitation did. (DT 252022)

Security

If you turned on the Enterprise Service Policy and did not include a BlackBerry device PIN in the allowed list, the BlackBerry device could not regenerate the encryption key. (DT 314516)
