Fixed issues

1

A vulnerability existed in the implementation of the logging of exceptions encountered during user or session management that could have allowed an attacker to gain access to logged shared secrets or domain credentials from the exception log. The vulnerability was limited by default access controls on the server. (JI 614885).

This interim security software update resolves the issue.

You must install this security software update on any computer that hosts a BlackBerry Administration Service instance within the BlackBerry Domain.

Install the security software

1. Browse to www.blackberry.com/go/serverdownloads and download the **SecurityUpdate12082014_besexpress504.zip** file that applies to the BlackBerry Enterprise Server Express versions that are running in your organization's environment.
2. Extract the contents of the .zip file to a temporary folder on any computer that hosts a BlackBerry Administration Service instance within the BlackBerry Domain. There is a folder (BAS QuickFix) with an executable file in it.
3. In the Windows Services, stop the BlackBerry Administration Service service.
Note: Backing up your existing BlackBerry Enterprise Server Express folders is recommended.
4. As an administrator, run the installer (BBQFInstaller.exe) in the BAS QuickFix folder.
5. In the Windows Services, restart the BlackBerry Administration Service service.

After you finish: To revert this security software update, stop the BlackBerry Administration Service service, restore the files that you backed up, and restart the BlackBerry Administration Service service.
