# BlackBerry Work for iOS version 3.1.0.7305

This release of BlackBerry Work for iOS features the following enhancements:

- **Search folders:** When a user navigates to a folder or moves an email message to a folder, a search bar that allows the user to navigate to the folder quickly is displayed.
- **Link to BlackBerry Access in app store:** When a user's policy does not allow them to use a browser to open links, and they do not have BlackBerry Access installed, a message that allows them to download and install the app is displayed when they tap a link that requires BlackBerry Access
- **New Add/Edit/View events UI:** The following changes have been made to the event UI in the BlackBerry Work calendar
  - **New Participants section:** The event UI contains a new Participants section. This section displays the organizer of the event, required participants, optional participants, and resources. When you create an event, the Organizer section is populated with your information. Participants are displayed in the order that they are added
  - **Show/hide participants:** If a section contains more than three participants, the first three participants are shown. Users can tap a Show more icon to see all participants.
  - **Participant icons:** When a user accepts a meeting invitation, that user's icon turns green in the Participants section for the event.
- **Convert an email message to a note:** If BlackBerry Note is installed on the device, users can convert email messages to notes.
- **Convert an email message to a task improvement:** When a user creates a task from an email message, the header of the email message is placed at the top of the body of the task.
- **BlackBerry Intelligent Security:** BlackBerry Work is integrated with BlackBerry Intelligent Security to reauthenticate users continuously while they are using the app and does not prompt them to reauthenticate.
- **Interoperability enhancements:** Users can now use BlackBerry Edit to edit Microsoft Azure-IP RMS or AD-RMS protected files. This feature requires BlackBerry Edit 3.0 or later.
- **Protect multiple files:** Users can now add Microsoft Azure-IP RMS (Rights Management System) or AD-RMS protection to multiple files (for example, Microsoft Office files, PDFs, and text) in a secure enterprise File Share, and from enterprise SharePoint, Box, and CMIS repository sites in the BlackBerry Work app. Protecting multiple files in zipped files and in your Local Docs folder is not supported.
