BlackBerry Work for Android version 3.5.0.1598

- **View schedule by month:** When viewing their calendar, a user can tap a down arrow at the top of the screen beside the name of day or week to see a preview of their schedule by month. The schedule for any associated shared calendars also displays. Days with a blue bar represent the user's calendar. Days with a grey bar represent a shared calendar. The user can tap on a day of the month to view their schedule for that day.
- **Sync draft folder:** Administrators can set a policy in the app configuration that prevents a user from deselecting the Drafts folder which prevents it from being automatically synchronized.
- **Search email:** The following improvements were made for searching email messages:
 - Words that a user searched for are highlighted in the search results.
 - Up to 10 recent searches are saved. Users can tap on entries in the Recent searches section of the Search page to quickly search for phrases that they have searched for previously. Users can edit their recent searches to remove phrases that are no longer relevant and to pin phrases that they want to use again.
- **Doze mode:** When a device is in doze mode, calendar reminders still display.
- **Add attachments:** Users can add attachments to meeting requests and manage attachments for existing meetings.
- **Convert email messages:** Users can convert an email message that contains attachments to a calendar event.
- **Recurring meetings:** The default setting for recurring meetings is no longer 'No end date'.
- **Active Directory password expiration warning message (Beta feature):** Administrators can configure a warning message that displays for users when their Active Directory password is about to expire.
- **Android 7:** BlackBerry Work no longer supports Android 7.

Fixed issues

When a delegate created an appointment in a shared calendar using BlackBerry Work, in Microsoft Outlook the appointment displayed as a meeting. (FIRST-17580)

BlackBerry Work users could not add a shared calendar after they were migrated from Microsoft Exchange 2010 to Microsoft Exchange 2016. (FIRST-17559)

Some users were not receiving BlackBerry Enterprise Mobility Server notifications when they received a new email message. (FIRST-17554)

BlackBerry Work stopped responding when a user was using biometric authentication if the 'Rooted OS or failed Knox attestation' setting was enabled in the compliance policy. (FIRST-17545)

When using Office 365 modern authentication, BlackBerry Work might have stopped responding when logging into Office 365 after a device was first activated. (FIRST-17537)

BlackBerry Work ignored the 'Clear the public certificate cache' setting. (FIRST-17529)

BlackBerry Work might not have accepted a user's log in name or email address during log in. (FIRST-17504)

When a user added an attachment to an email message and then deleted the attachment, the user could not add the attachment again. (FIRST-17459)

BlackBerry Work went into the background after being opened. (FIRST-17452)

Some users were locked out of their Microsoft Active Directory accounts after they changed their password. (FIRST-17227)

If users received multiple email notifications they could not open each of the email messages from the notification window. (G3ANDROID-19564)

When users changed from the dark theme and rotated the device to view files, the BlackBerry Work Docs app displayed the screen with both the light and dark themes. (G3DOCS-7275)

Known issues

In BEMS Cloud environments, when a user uploads a file that is larger than 50 MB, the upload fails. (G3DOCS-7972)

Workaround: Upload the file again.

Known limitations

You cannot use the Active Directory password expiration warning message feature for Cloud users who are using Azure active directory or mailbox online. (G3ANDROID-23448)
