BlackBerry Work for iOS fixed issues

When iPad users used a Magic Keyboard configured with the Japanese layout, the BlackBerry Work app stopped responding. (G3IOS-37911)

BlackBerry Work for iOS known issues

Sometimes when users try to add a .pkpass file to the Apple Wallet, the file is not added, and an error message is not displayed. (G3IOS-37554)

Workaround: Force close the BlackBerry Work app and try to add the file again.

When you repeatedly open the BlackBerry Work app on your Apple Watch to synchronize the data from your mobile device, the Apple Watch gets stuck on updating and displays the following error message: "No event and No unread emails". This issue occurs intermittently. (G3IOS-36987)

Workaround: Restart BlackBerry Work on your Apple Watch.

The "Working elsewhere" status is not fully supported in the BlackBerry Work Calendar app. The status is synchronized to and displayed on the calendar, but users cannot set or change this status on their devices. This is a known limitation of the feature. (G3IOS-29861)

When users scrolled through the Inbox, the BlackBerry Work app stopped responding and users could not access their email messages. (G3ANDROID-12515)

Sometimes after the BlackBerry Work app stopped responding, only newly synchronized email messages were displayed. (G3ANDROID-7358)

If the BlackBerry UEM administrator enabled Play Integrity attestation, the activation process for BlackBerry Dynamics apps (BlackBerry Access, BlackBerry Work, BlackBerry Connect, BlackBerry Notes, and BlackBerry Tasks) could take longer than expected to complete. For more information, see [KB 140422](#). (GD-67446)

BlackBerry Work for Android known issues

When your administrator has the "Require password when BlackBerry Dynamics apps return to the foreground" policy setting enabled, and users try to add a photo library file to a composed email message they are prompted to enter a password before it is added. (G3ANDROID-31659)
